Steel Kitchen Cabinets

Beautiful - Cleanly - Convenient - Everlasting

STEEL Kitchen Cabinets

THE many advantages of steel in the construction of kitchen furniture are so manifest that it would seem almost superfluous to mention them.

However, the habit of employing wood for the building of kitchen cabinets, cupboards, tables, stools, etc., dates so far back and has, therefore, become so fixed that perhaps a few words of comparison may not come amiss.

Before the advent of steel, wood was the only available material for such construction. Even when the first so-called kitchen cabinets were built the cost of steel was prohibitive. Moreover, the processes then available for forming and joining steel plates were impractical for use in building kitchen furniture.

However, as time went on and good lumber became scarcer and higher in price, our artisans grew more and more expert in the production, fashioning and joining of steel plates, until now, with the application of electricity to every detail of construction, sheets of enduring steel are rigidly welded together into every desirable form.

These developments in the fields of both steel and lumber have brought the costs of these products so nearly on a par that there is little, if any, difference in price between high grade wooden cabinets and those entirely constructed of steel.

The four cardinal points desirable in a kitchen cabinet may be briefly set forth

as Appearance, Convenience, Cleanliness and Durability.

Placed side by side, a wooden and an all-steel cabinet present such a wide difference in appearance—in simplicity of lines, smoothness, hardness and beauty of finish—that one immediately selects the steel cabinet.

Convenience is more than a matter of arrangement. In this steel cabinet a great saving of time and annoyance is represented in well-constructed steel doors and drawers, as they will not sag, swell or twist, stick or bind from the action of heat, cold or dampness.

The materials used in steel construction are, in themselves, absolutely sanitary. There are no cracks or crannies where dirt, dampness, or other disease-breeding agents can accumulate. Rats and mice cannot gnaw through nor contaminate foods and linens. Steel will not absorb odors or moisture. Every part is easily accessible for thorough cleansing with hot water and soap, and is quickly and easily dried.

Steel is practically everlasting. There is nothing to wear out or deteriorate—no glue, nails or screws to loosen—nothing to crack, warp, rot or shrink.

The wise housewife is certain to appreciate these advantages possessed by the all-steel cabinet and other items of kitchen furniture illustrated and described herein.

Steel Kitchen Cabinets

Beautiful - Cleanly - Convenient - Everlasting

Royal Ossco Kitchen Cabinets

IN building Royal Ossco, All-steel Kitchen Cabinets we have employed every facility of modern science and engineering to produce such a cabinet as would express the last thought in the four cardinal points admittedly the most desirable—

Appearance,

Convenience,

Cleanliness and

Durability.

From every viewpoint, and from every practical test, it has been determined that steel is the logical material for the construction of Kitchen Cabinets. Therefore, we have used steel entirely in our cabinets.

Royal Ossco Cabinets are built from plates of open hearth steel. Special machines form these plates and electrically weld them together into practically one piece, without need for bolts, screws or rivets, and the reinforcements of the steel plates are so placed as to insure permanent rigidity.

The specifications governing the dimensions of Royal Ossco All-steel Cabinets result from scientific study of actual

kitchen problems, carefully worked out and proven by expert engineers.

The design and structure having thus been perfected, special attention has been devoted to the finishing of Royal Ossco Cabinets. For this purpose, experience and experiment have developed a superior system of enameling and heat treatment, through which a smooth, tough, pure white surface is produced permanent, handsome, sanitary and easy to clean.

As the keyboard arrangement of a modern typewriter has been evolved to meet the requirements of speed and efficiency, so the arrangement of the Royal Ossco Kitchen Cabinet has been designed to eliminate unnecessary motions, save steps and lighten labor in the kitchen.

By this method all the conveniences of these cabinets are greatly enhanced by their time-saving arrangement.

Fittings of Royal Ossco Cabinets add greatly to its trim appearance. Hooks, handles, etc., are thoughtfully placed. All articles of equipment are of best quality, most convenient and attractive.

SPECIFICATIONS

Series "A" Cabinets (Four Styles)

ALL series "A" Cabinets are made from Open Hearth Steel, electrically welded together and finished in white enamel, baked on. They have double padded noiseless doors, glass knobs, friction door catches (no knobs to turn, just a straight pull or push to open or close), and never-stick, softly-sliding drawers.

This is the cabinet tested and approved by "Good Housekeeping" Institute, conducted by Miss Mildred Maddocks.

No. 506. As illustrated on opposite page; Porcelain work top, size 26 by 41½ inches; height, over all, 68 inches; width, 42 inches; crated weight, 290 pounds.

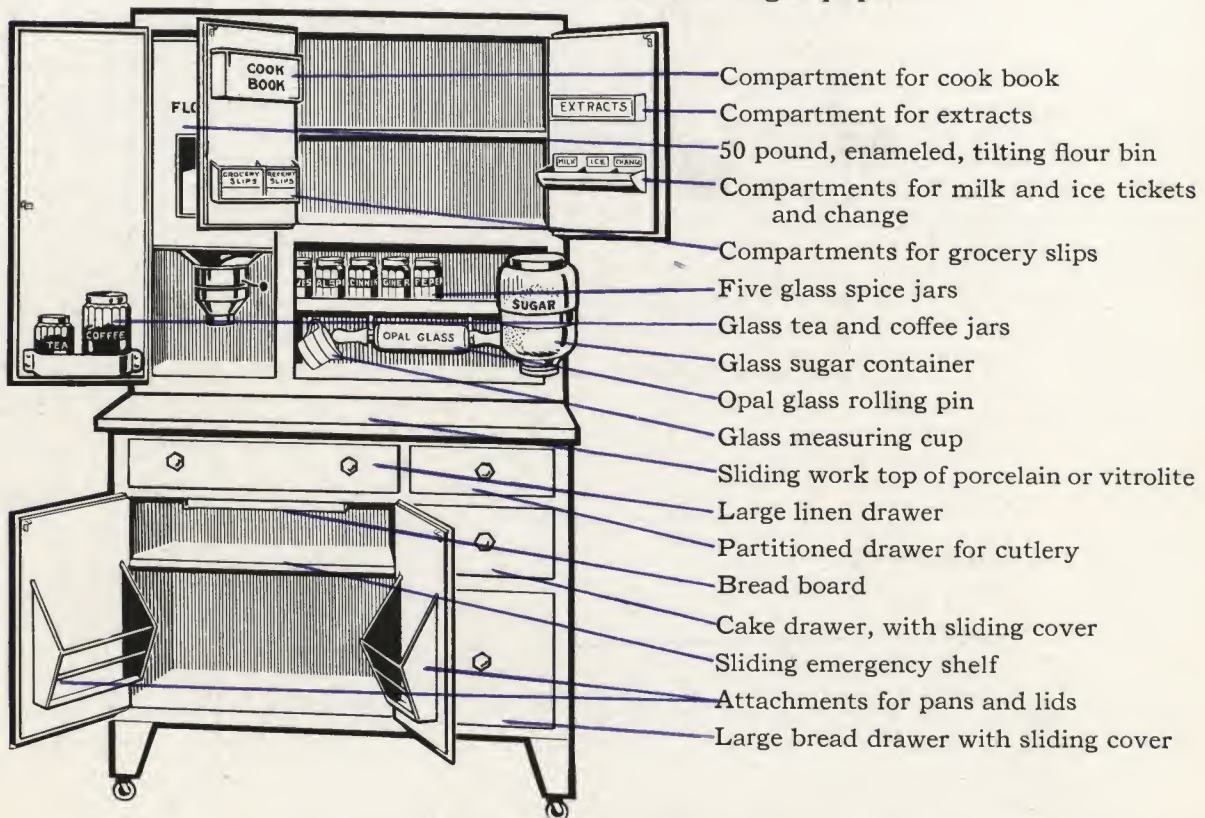

No. 512. As illustrated on opposite page; Vitrolite work top, size 26 by 41½ inches; height, over all, 68 inches; width, 42 inches; crated weight, 340 pounds

No. 505. With open spice compartment, as shown in illustration on this page; Porcelain work top; size 26 by 41½ inches; height, over all, 68 inches; width, 42 inches; crated weight, 285 pounds.

No. 511. With open spice compartment, as shown in illustration on this page; Vitrolite work top, size 26 by 41½ inches; height, over all, 68 inches; width, 42 inches; crated weight, 335 pounds.

Details of Construction

MUCH of the durability, usefulness and convenience of the kitchen cabinet depends upon its construction details. These have been worked out by us with scientific precision, yet so simply as to avoid every chance of anything getting out of order.

Convenience

A place for everything and everything in its place—within easy reach—insuring efficiency — saving time.

Flour Bin

Notice how flour bin tilts forward and locks in position to receive flour. Easy to remove and replace. Dustproof window in front.

Cleanliness

Smooth, hard, enameled surfaces; easy to clean and keep clean. Washed with just soap and water, like a china plate.

Doors

Double construction and padding of doors prevent rattling, warping, shrinking or sagging. The only noiseless, all-steel door.

Drawer Covers

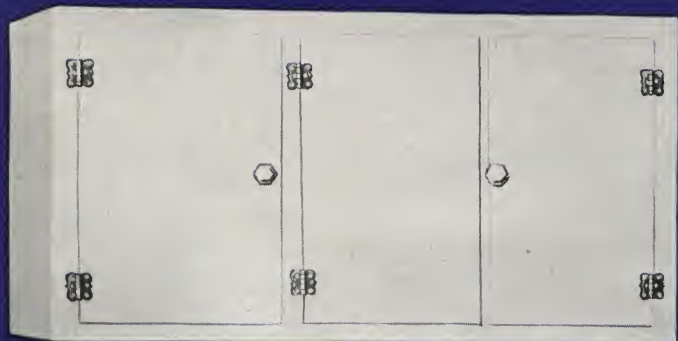

Showing easily sliding, metal cover of noiseless, never stick bread (and cake) drawers. Keeps moisture in and vermin out.

Such essential features, of which these are examples, are impossible to find in any but the Royal Ossco, All-steel Kitchen Cabinets, making them the favorite of the particular housewife.

Royal Ossco
All Steel-Sanitary

Steel Kitchen Furniture

Beautiful-Cleanly-Convenient-Everlasting

Cupboard Unit

No. 520. Used on wall above table or may be added to our Series A Kitchen Cabinets. All steel, electrically welded, white enamel finish, baked on. Height 20 inches; width, 40 $\frac{3}{4}$ inches, depth, 12 $\frac{1}{4}$ inches; crated weight, 80 pounds.

Sink Cabinet

No. 580. Something new and just what the tidy housewife has been demanding—a handy receptacle near the sink for brushes, soaps, soap powders, pot cleaners, etc. Made at the suggestion of and approved by Miss Mildred Maddocks, Director of "Good Housekeeping" Institute. Same construction as our Steel Kitchen Cabinets.

Stool

No. 561. Open Hearth Steel, electrically welded and finished in baked on, white enamel. Sturdy, light and serviceable. Height, 24 inches; crated weight, 13 pounds.

Kitchen Tables

Made entirely of steel, electrically welded and with baked on, white enamel finish. Rigid and practically everlasting. Hinged top allows the use of two spaces for storage at the sides of the drawer. The most substantial and only sanitary table. Easy to clean and keep clean. Does not absorb moisture. Steel Tables are rapidly replacing rickety wooden ones in the modern kitchen. Made in two styles; size 26 by 41 $\frac{1}{2}$ inches.

No. 551. Opalite top, crated weight, 140 pounds.
No. 555. Porcelain top, crated weight, 90 pounds.

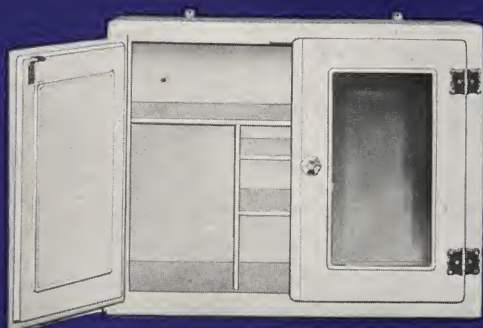

Royal Ossco
All Steel - Sanitary

The Royal Ossco[★]

All Steel - Sanitary

Kitchen Cabinets

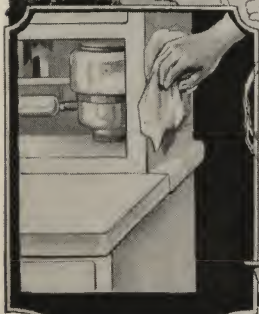

THIS is an age of steel, outdoors and in. Business men use steel office equipment because of its durability, cleanliness, protection to contents and beauty of finish. The same advantages are even more marked in steel kitchen furniture. It is unaffected by kitchen heat, steam or frequent washing. Steel cannot absorb odors or moisture, never swells, warps or cracks, and can be kept clean and sweet, always. The Royal Ossco Steel Kitchen Cabinet proves steel to be the distinctive, economical and practical kitchen cabinet material of today and the future.

Beautiful - Durable - Clean - Convenient

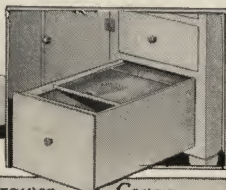

With utmost convenience of arrangement, the Royal Ossco Steel Kitchen Cabinet combines the strength of electrically welded steel and the cleanliness of dazzling white, baked on enamel. Its cost is practically no more than the old-fashioned wood cabinet. Such special features as bread drawers with moisture-tight sliding covers, and silent padded doors with automatic catches are constant helps to you. The steel drawers in the Royal Ossco Cabinets never swell or warp, cannot stick. Welded steel leaves no cracks for mice, ants and other pests to enter. Food does not become spoiled or tainted from this wonderful cabinet. Its cleanliness, convenience and beauty make the preparation of every meal a pleasure.

Examine the Royal Ossco Steel Kitchen Cabinet at your dealer's. If you do not find it, write for our handsome new circular in colors, attractively illustrating the many superior advantages of the Royal Ossco Cabinet.

HEIRLOOMS

A Royal Ossco Steel Cabinet Will Last for Generations

THIS electrically welded and pure white enameled steel cabinet will become the heirloom of future generations—no whit less serviceable or attractive with the flight of years. Steel is proven to be the distinctive, economical and practical kitchen cabinet material of today and the future. The Royal Ossco Cabinet is the triumph of steel construction, in convenience, strength, cleanliness, and beauty.

You will find Royal Ossco Steel Kitchen Cabinets convenient beyond the possibilities of other cabinet materials, and but slightly different in price. Electrically welded steel eliminates glue and screws that loosen, and rivets that catch. Royal Ossco drawers never stick, but fit snugly to keep out mice, ants and dust. There are no pores to absorb moisture and odors—no wooden parts to shrink, crack or swell. A damp cloth keeps the Royal Ossco Kitchen Cabinet as clean as new, always. Examine the Royal Ossco at your dealer's. If you do not find it, write for our handsome new circular in colors, attractively illustrating the many superior advantages of the Royal Ossco Steel Cabinet.
